

Conor Magee

Software Engineer – QA Tester

23 St. Agnes Drive, Belfast, Northern Ireland, BT11 8GZ

☎ (+44) 7309855637 | ✉ conor.magee@outlook.com

Professional Profile

Computer Science graduate with a background in QA automation and over five years' experience in analytical and data-driven operational roles. Strong problem-solving skills with experience investigating issues, analysing large datasets, improving processes, and working with technical systems. Looking to leverage both my technical foundation and professional experience in a software development, QA, or technical engineering position.

Education

University of Ulster

Northern

Ireland

BSC in Computing Science (2:1)

Sept 2009 - June 2014

Experience

Concentrix CVG

Belfast,

Northern Ireland

Associate Real Time Analyst

Feb 2021 - Present

Key responsibilities

- Monitoring and analysing real-time operational data to identify trends, risks, and performance issues impacting service delivery.
- Producing and maintaining detailed reports and dashboards using Excel and other reporting tools to support business decision making
- Collaborating with management and operational stakeholders to provide data-driven recommendations and support strategic planning.
- Developing an improving spreadsheet based processes, formulas and reporting solutions to increase efficiency and reduce manual tasks.
- Created automated workflows through Microsoft Teams to automate a number of tasks that would otherwise be time consuming.
- Acting as a technical point of contact for reporting, scheduling and workforce management queries.

Grant Thornton UK LLP

Belfast, Northern Ireland

CAST Administrator

Dec 2019 - July 2020

My role within Grant Thornton as a CAST Administrator was to ensure the quality of documentation met the standards of the company before leaving the CAST department, I was also tasked with manipulation of

data within excel spreadsheets and added extra value to the team with my computing background creating shortcuts for the team that were officially implemented into their process during my time there.

My time with Grant Thornton was fully remote working, I worked from home for the full 7 month contract, and gained valuable experience in successful homeworking skills.

Automated Intelligence

Northern Ireland

QA Software Engineer

Belfast,

Sept 2014 - Feb 2016

Key responsibilities

- Writing automated scripts that ran nightly, and analysing the results each morning before compiling a progress report for management.
- At times; contacting customers to run a demo of our new functionality as and when it was put into testing.
- Reviewing official technical documentation that was sent to customers along with the product.
- Participating in daily sprint meetings discussing progress and issues/roadblocks with any area of testing and further weekly meetings to discuss the following weeks plan.

Tools Utilised

- Selenium IDE
- Postman
- MySQL & PostgreSQL
- Trello (For bug tracking and feature progress)

Key achievements/projects

- Tested the scheduling e-mail client successfully in what became AI's highest recorded customer sale in the company's history (Danske Bank)
- Received funding from the CEO of AI to set-up a company football team where we completed and finished 2nd in the Computing Industry Football League.

IBM

Northern Ireland

Junior QA Software Engineer

Belfast,

Jun 2013 - Sept 2014

My role within IBM as a student on work placement was joining their new automated testing team and running scripts daily and producing reports on how stable each version of the product was. I was given more responsibility after a number of weeks following high quality work and the speed and accuracy in which I was able to complete tests and produce reports to management.
